

People Centred Knowledge Management

A presentation to the [City Information Group](#) by
[Matt Mower](#) of [Evector Software](#) – 27th April 2004

The background features a dark blue-grey color with faint, light-colored graphics. On the left side, there is a compass rose with a needle pointing towards the top-left. Below the compass, there are some faint symbols, including a dollar sign (\$) and the letters 'SA'. The right side of the background is dominated by a topographic map with various contour lines and shapes.

3 important challenges
for **organisations.**

The background features a dark blue-grey color with faint, light-colored graphics. On the left side, there is a compass rose with a needle pointing towards the bottom-left. To its right, a line graph with several peaks and valleys is visible. The text is centered in the upper half of the image.

3 important challenges
for **knowledge workers.**

Thought experiment #1: Trust.

Thought Experiment #2: Shared Context.

Knowledge management **is** social.

“Business is a social enterprise with
economic ends”

Daniel P. Burnham – former CEO of Raytheon

A weblog helps you to build your expertise.

CURIOUSER AND CURIOUSER!
"Where shall I begin, O Great One?" He asked. "Begin at the beginning," the King said, "very bravely, and we'll all go with you down to the end; that way."

Using Open Office to convert MS Word documents. Rickard Oberg recently posted a request for suggestions about using Java to convert MS word docs into HTML. I have been doing some work on the lately using the freely available, open-source OpenOffice.org to do the hard parts, making calls... [\[schd-keeper.org\]](#)

Paul has done some very craft work here -- many people want to solve this problem. In fact it's a problem that he and I worked on last year. At that time we were looking for out of the box tools to do the job and not getting very far with it. Since then he's cooked up a clever solution by implementing JFC with an OpenOffice server. Neat!!

[The Google Bubble](#)

Everyone's talking about [Google](#) because the company has to release some key financial data this week, causing lots of folks to assume an IPO filing is in the works. No doubt that's true, but I keep wondering why -- except to make the insiders happy -- this IPO is going to happen at this stage.

Here we have a successful company, making (reportedly) tons of money and investing it wisely. Does Google need the distraction an IPO will bring as much as the insiders -- especially the venture capitalists -- crave the cash-out?
